

ToTc Productions Presents: "Skales" for LazySnake

Title: "Skales"

VSTi: LazySnake VSTI, by: Andreas Ersson

OS: Windows 2000, XP

Format(s): FXP, FXB

Total Presets: 64

Description: "Skales" is a full bank of 64 presets, for the LazySnake VSTI. It represents my exploration of this synthesizer, and shows that it can do a little more than electric pianos. There are various EPs, Basses, Sound Effects, and more; some will prove extremely useful, while others will remain more experimental. There is also a custom made, ToTc Productions-Themed skin included in the package, made by local kvr-ist Tuzemec. To install it, simply extract the "tzm.fsf" file into your LazySnake Skins Directory. Once you have done so, you will be able to select it from the Skins Menu within LazySnake. I hope you enjoy this new, freebie from ToTc Productions!

Thank you for your support,

Frank Genus (Trains of Thought Collide Productions)
